

Another Resorts first! Blackjack Match Progressive is a side bet in blackjack. Players must have a regular blackjack wager in order to play the progressive. Progressive wagers are placed on sensors in the table in the same method as our existing poker progressives. Progressive wager must be \$5.00.

- After all wagers are placed, press START GAME on the dealer keypad. Collect progressive wagers.
- Deal cards as usual.
- Pay and take any Match the Dealer wagers after all cards are dealt.
- The dealer will now check for blackjack. Any winning Blackjack Match wagers will be paid at this time and before any additional cards are dealt.
- If a player wins any of the top two payouts, settle all other hands before processing the jackpot.
- Top two payouts require same paperwork as in pit 5. All other payouts come from the table inventory.
- Anyone with a progressive sensor light lit will be eligible for an ENVY bonus anytime another player **wins** any of the top two payouts. The winner of the top two payouts must also have the sensor light lit for other players to be eligible for the ENVY bonus.
- Announce out loud any progressive wager payout. The top four payouts need supervisor approval.
- The top four payouts include DEALER AND PLAYER blackjacks. The bottom three payouts are only PLAYERS hand.
- Blackjack Match progressive tables will be managed by the progressive computer in pit 5. The process of awarding any winning progressive will be the same process as our existing progressives.
- The Blackjack Match tables will have the same dealer touch pad in the rack as our other progressives.
- All payouts are fixed amounts as shown below, not "to 1".

PAY TABLE FOR \$5.00 PROGRESSIVE WAGER
